## EPM Model Office Toolkit

*From IRW Systems— the EPM Model Office Toolkit is a flexible but powerful solution platform for organisations running multiple projects, with ranges of resources and skills.*

IRW Systems have been providing bespoke software solutions to a wide range of UK public, private and not-for-profit sector organisations for over 15 years.

Following the completion of a number of Project Server based projects for Councils, the NHS and private industry the EPM Toolkit solution was designed by IRW Systems to provide a flexible but powerful "Model PMO Office" solution platform for organisations running multiple projects, with ranges of resources and skills.

**How you can benefit:** The EPM Toolkit includes the following functions, capabilities and benefits:

- Single location for proposing, reviewing and approving programmes and projects
- Document Management — single location for managing all project documentation — utilising templates stored in project workspaces
- Consistent project plans — with project data being stored in a central Project Server database to enable easy reporting on all programmes and projects
- Consistent standard reports — to enable quick, flexible and effective reporting across the organisation
- Programme and Project level outputs, management information, exception and KPI reporting

**Technology:** The EPM Model Office Toolkit is based on Microsoft Project Server and Microsoft SharePoint.

IRW offer the EPM Toolkit as an on-premise or an online application.
